Cambridge Scale Works, Inc. has designed our Model 770 Series with unique "drop-in-place" modules and convenient alignment mounting pins for easier installation.

This photo illustrates the modular connection with the asphalt plate for center leveling foot and scale support.

Each module is independently wired at the factory for quick and easy installation. The stainless steel NEMA IV junction boxes are prewired and only require a single signal cable from one of the boxes to the indicator.

This photo illustrates the optional asphalt package ramp understructure.

Optional ramp has an asphalt package and locator plates. The asphalt package supports the scale on asphalt and protects the scale from settling. The locator plate properly aligns the ramp and scale and supplies proper clearance for operation.
