

Analog Scale User Tips

For Best Results:

1. Do not weigh on carpet.
2. Use the scale on a flat and level surface.
3. Stand on the scale with both feet placed evenly and center your weight between them. Leaning forwards or backwards can affect accuracy.
4. This scale does not require lubrication of the internal parts.
5. Make sure the scale reads zero before weighing. Use the zero adjustment dial on the front of the scale to return the scale to zero.
6. Don't use harsh chemicals to clean your scale. Instead, use a cloth and warm water.
